Task Description #1 – Stack Implementation

Task: Use AI to generate a Stack class with push, pop, peek, and is_empty methods.

Sample Input Code: class Stack:

```
pass
```

Expected Output:

- A functional stack implementation with all required methods and docstrings

PROMPT:

```
#Write a code to generate a stack class with push,pop,peek and isEmpty methods
```

CODE:

```

• lab6.py > ...
1  #Write a code to generate a stack class with push,pop,peek and isEmpty methods
2  class Stack:
3      def __init__(self):
4          self.stack = []
5      def push(self, item):
6          self.stack.append(item)
7      def pop(self):
8          if not self.isEmpty():
9              return self.stack.pop()
10         else:
11             raise IndexError("Stack is empty")
12     def peek(self):
13         if not self.isEmpty():
14             return self.stack[-1]
15         else:
16             raise IndexError("Stack is empty")
17     def isEmpty(self):
18         return len(self.stack) == 0
19 # Example usage
20 if __name__ == "__main__":

Task Description #6 – Graph Representation

Task: Use AI to implement a graph using an adjacency list.

Sample Input Code: class Graph:

```
pass
```

Expected Output:

- Graph with methods to add vertices, add edges, and display connections.

PROMPT:

#Write a code to implement a graph using an adjacency list and perform methods like add_vertices,add_edges and display connections CODE AND OUTPUT:

The screenshot shows a code editor with a dark theme. At the top, there's a file icon followed by the text "palindrome.py > ...". Below that is the Python code for a Graph class. The code includes methods for adding vertices and edges, and displaying connections. At the bottom of the code, there's an example usage section. Below the code editor, there's a navigation bar with tabs: PROBLEMS (1), OUTPUT, DEBUG CONSOLE, TERMINAL (which is underlined), PORTS, and POSTMAN CONSOLE. The terminal tab shows the command "PS C:\Users\thota\OneDrive\Desktop\AIAC> & C:/Users/thota/AppData/Local/Programs/Python/Python313/python ./AIAC/palindrome.py" and the output "A: B, C\nB: A, C\nC: A, B". There's also a circular arrow icon next to the terminal tab.

```
